Ryan C. Bowlin

rcbowlin1@gmail.com · LinkedIn · GitHub · Website · Sunnyvale, CA

Product manager who gets it right when being wrong is expensive. Twelve years shaping executive decisions ($1B+ in 0-to-1 investments, a $300MM+ partnership, CEO-level reviews) and now building LLM-orchestrated systems that clear legal review the first time.

SKILLS Applied AI & LLMs · PRDs / BRDs / PR-FAQ · AI evaluation · 0-to-1 product & GTM · adoption & change management · stakeholder & client management · executive communication · Python · SQL · Power BI · business & price-elasticity modeling

EXPERIENCE

Amazon

Sunnyvale, CA · June 2020 – Present

Senior Product Manager, Energy & Sustainability *Jan 2025 – Present*

- Built and operate an LLM-orchestrated, deterministic content pipeline (Python, Figma via MCP): 28 of 28 fact sheets across 14 programs cleared legal, PR, and GTM review with zero corrections in 2026. Code computes every number from assured data, and a fail-closed QA gate blocks publish on any failed check.
- Cut per-program production time 51% (hitting the 50% goal) and the production budget by over 90%, eliminating the need for a ~$110K/yr design-platform contract and seasonal temp staffing. Architected for 14 marketplaces and 32 locales, with 2026 scoped to US English and Spanish to prove quality first.
- Authored the business case (BRD) and product requirements (PRD) for an AI content-automation platform and its successor products, spanning business objectives and ROI through requirements, workflows, edge cases, and evaluation criteria for AI systems.
- Gathered customer stories and field insights to shape the roadmap, working backwards from real customer problems to proposed solutions, then formed the planning narrative that won VP/SVP alignment.
- Turned sustainability into a sales differentiator for Amazon Leo's enterprise and government pursuits, where buyers often require it: built the pitch narrative used in closed-door negotiations and at AWS re:Invent, and prepared sales teams for buyer questions. Built eero's carrier-facing equivalent, updated as product features changed.

Product Manager, Finance (New Product Innovation) *Oct 2022 – Jan 2025*

- Shaped $1B+ of 0-to-1 investment decisions across 5 product lines and 15+ new businesses, leveraging incomplete information with no established playbook.
- Drove 0-to-1 evaluation of ambitious new-business bets (indoor agriculture, an EV-charging network, a home energy-management hardware platform), weighing customer, technical, and economic trade-offs under deep uncertainty; two reached CEO-level review.
- Owned the business model, cost structure, and revenue-share recommendation for a $300MM+ co-development partnership with a third-party company; re-modeled scenarios through multiple redline rounds, and my recommended rev-share structure was adopted in the final agreement.

Senior Product Analyst, Finance *June 2020 – Oct 2022*

- Led the go-to-market pricing analysis for Halo Rise, driving a 15% MSRP increase and securing SVP alignment.
- Co-authored the PR/FAQ for Amazon's Echo custom silicon (AZ3 / AZ3 Pro) and modeled the product-intercept plan: products, unit volumes, cost impact, and features to design for.
- Dropped into an unfamiliar operations problem and saved millions by restructuring sourcing and manufacturing strategy ahead of regulatory change.

Heineken USA

White Plains, NY · Sept 2018 – June 2020

Senior Strategy Manager, Revenue Management *Sept 2018 – June 2020*

Advanced from Strategy Manager

- Built Python and Power BI automation that replaced manual reporting, sharpened insights, and rapidly generated sales decks for commercial teams.
- Reporting to the CFO, generated ~$30MM in organic sales growth optimizing pricing and promotion across brands (Heineken, Dos Equis, Tecate) and major distributors nationwide.
- Led creation of Heineken USA's Revenue Management team, partnering with global leaders on KPI frameworks, operating rhythms, and cross-org alignment.

Henkel Stamford, CT · May 2015 – June 2018

Associate Manager, Revenue Management *May 2015 – June 2018*

Advanced through three roles: Sales/Category Development Analyst → FP&A Analyst → Associate Manager

- Built the store-level allocation model behind Dial's $0.93 EDLP launch at Walmart, matching each store's weekly sell-through to shelf capacity, driving 300%+ revenue growth. When Walmart's buyer pushed back on shipment volumes, walked them through the model and secured agreement, then partnered with supply chain to prioritize top sell-through stores; the price investment earned 7 endcaps for the year.
- Drove $55MM in profit across key retail accounts with assortment, pricing, and promotion strategies grounded in price-elasticity modeling.
- Stood up Henkel's Canadian Revenue Management function from the ground up, aligning with the Canadian GM and Marketing VP on KPIs and strategic plans.

Advantage Sales & Marketing Bentonville, AR · Feb 2014 – May 2015

Category Manager *Feb 2014 – May 2015*

Advanced from Category Analyst

- Managed weekly performance reporting and Walmart/Sam's Club sales pitch decks for ~15 CPG clients at once, aimed at growing their distribution.
- Promoted to embedded consultant for Sargento and Church & Dwight: their day-to-day analytics partner on store-level product and category performance across Walmart's U.S. footprint, turning findings into the recommendations they took to Walmart and Sam's Club buyers to win merchandising and placement decisions.

EDUCATION

American University, Kogod School of Business, MBA, Concentration: Data Analytics

Arkansas Tech University, BSBA, Concentration: Management & Marketing
