Product manager who gets it right when being wrong is expensive. Twelve years shaping executive decisions, including $1B+ in new-business investments and a $300MM+ partnership, and now building AI systems that clear legal review the first time.

SKILLS LLM orchestration · MCP · AI evaluation · Claude & Claude Code · Python · SQL · Power BI · PRDs, BRDs & PR/FAQs · 0-to-1 product & GTM · pricing & elasticity modeling · client & stakeholder management · change management

EXPERIENCE

Amazon

Sunnyvale, CA · June 2020 – Present

Senior Product Manager *Jan 2025 – Present*

- **Built and run, with one engineer, an AI pipeline for customer-facing product fact sheets.** It's LLM-orchestrated and deterministic, so code computes every number from assured data and a fail-closed QA gate blocks bad output. All 28 sheets in 2026 cleared legal, PR, and GTM review with zero corrections.
- **Cut production time 51% and the budget by over 90%**, juggling stakeholder requests across 14 programs through the peak fall launch with no temp staff and no $110K-a-year design contract. Built it for 14 marketplaces and 32 locales, then launched in US English and Spanish first to prove quality.
- **Wrote the business case, requirements, and roadmap** for the AI platform and its follow-on products, starting from working prototypes and covering workflows, edge cases, and evaluation criteria. Grounded the plan in customer research and field input, winning SVP support through annual planning.
- **Built the sustainability story for Amazon Leo's enterprise and government sales.** Worked with designers on the deck used in 5+ major account pursuits and at AWS re:Invent, coached the sales team on buyer questions, and built the same for eero's carriers.

Product Manager, Finance (New Product Innovation) *Oct 2022 – Jan 2025*

- **Shaped $1B+ in new-business investment decisions** across 5 product lines and 15+ businesses, from indoor farming to an EV charging network to home energy management systems. With no playbook, worked out how each idea could become a business worth building; two reached CEO-level review.
- **My revenue-share structure was adopted in a $300MM+ co-development deal.** Owned the business model and cost structure, and re-ran the numbers through several rounds of redlines.

Senior Product Analyst, Finance *June 2020 – Oct 2022*

- **Shipped 3 consumer-electronics products with a ~20-person team** as finance and GTM partner to Build It, a CEO-sponsored test of how lean a hardware team can be. Co-defined the business, weighed features against customer needs, and built the demand and business models.
- **Saved $25MM+ in import duties** by moving final assembly from China to Vietnam ahead of regulatory change, a first for a new-device program at Amazon. Came in with no operations background.
- **Raised Halo Rise's launch price 15%** by leading the pricing analysis and getting SVP sign-off.
- **Co-wrote the PR/FAQ for Echo's custom silicon** (AZ3 and AZ3 Pro) and modeled which devices would use it, at what volumes and cost.

Heineken USA

White Plains, NY · Sept 2018 – June 2020

Senior Strategy Manager, Revenue Management *Sept 2018 – June 2020*

Advanced from Strategy Manager

- **Grew organic sales ~$30MM** by reworking pricing and promotions for Heineken, Dos Equis, and Tecate with distributors nationwide, reporting to the CFO.
- **Built Heineken USA's Revenue Management team from scratch**, replacing sales-led deals that favored retailers and promo calendars copied from last year. Our team of under four kept only the promotions that worked and rolled out the changes with sales and marketing.
- **Automated manual reporting** with Python and Power BI, building sales decks for the commercial teams.

Henkel

Stamford, CT · May 2015 – June 2018

Associate Manager, Revenue Management *May 2015 – June 2018*

Advanced through three roles: Sales/Category Development Analyst → FP&A Analyst → Associate Manager

- **Built the store-level model behind 300%+ Walmart revenue growth** on Dial's $0.93 everyday low price. Defended it when Walmart's buyer pushed back on volumes, aligned supply chain on the top stores, and the launch earned 7 endcaps for the year.
- **Drove $55MM in incremental profit across key retail accounts** with assortment, pricing, and promotion plans built on price-elasticity models. Replaced retailer-friendly, sales-led pricing and repeat promo calendars with unbiased analysis, then worked with sales and marketing to put the new plans in place.
- **Created Henkel Canada's Revenue Management team** with the Canadian GM and local Marketing VP, then oversaw adoption of its key pillars, guiding the business unit through strategic and organizational change.

Advantage Sales & Marketing

Bentonville, AR · Feb 2014 – May 2015

Category Manager *Feb 2014 – May 2015*

Advanced from Category Analyst

- **Supported about 15 CPG clients at once** with weekly reporting and Walmart and Sam's Club pitch decks aimed at growing their distribution.
- **Promoted to embedded analytics partner for Sargento and Church & Dwight**, turning Nielsen and store-level data into the recommendations they took to Walmart and Sam's Club buyers.

EDUCATION

American University, Kogod School of Business, MBA, Concentration: Data Analytics

Arkansas Tech University, BSBA, Concentration: Management & Marketing
